

## Experiment 10 — Audit Planning and Issue/Findings Management

### Title

Audit Planning and Issue/Findings Management

### Aim

To plan and conduct internal control audits in Eramba, evaluate audit results, document conclusions, and manage issues/findings identified during the audit process.

### Objectives

- To create and schedule internal control audits.
- To define audit methodology and success criteria.
- To assign audit owners and evidence owners.
- To record audit results and conclusions.
- To identify and manage audit issues/findings.
- To track the status of identified issues.

### Procedure

1. Log in to the Eramba GRC platform.
2. Navigate to **Control Catalog** → **Internal Controls** → **Audits**.
3. Create/import audit records for relevant internal controls.
4. Define the Audit Methodology for each control.
5. Define the Audit Success Criteria.
6. Assign the Audit Owner and Audit Evidence Owner.
7. Enter the planned start date and audit dates.
8. Perform/review the audit against the defined methodology and criteria.
9. Record the Audit Result as *Passed* where the control satisfies the criteria.
10. Record the Audit Conclusion describing the outcome and supporting evidence.
11. Navigate to **Control Catalog** → **Internal Controls** → **Issues**.
12. Create/import issues or findings associated with audited controls.
13. Record the issue description, responsible owner, status, and relevant dates.

14. Set the finding status to *Open* when corrective action is still required.
15. Review the audit and issue registers to confirm that audit results and findings are properly recorded.

Figure 10.3: Internal Control Audit Item Details

The screenshot displays the 'Internal Control Issues' section of the Eramba application. The left sidebar contains navigation links for Dashboard, Program, Organization, Asset Management, Control Catalog, Internal Controls, Policies, Policy Exceptions, Continuity Plans, Support Contracts, Risk Management, and Compliance Management. The main content area shows a table of internal control issues. The table has columns for Dynamic Status, Internal Control, Status, Start Date, End Date, and Description. The status of all items is 'Open'.

| Dynamic Status                                                                                      | Internal Control                  | Status | Start Date | End Date    | Description                                 |

Figure 10.4: Internal Control Audits Register

## Conclusion

The experiment demonstrated how Eramba can be used for audit planning, execution, documentation, and issue management. Audit evidence and results can be recorded against internal controls, while identified findings can be tracked separately until they are resolved.
